

Frontend Developer Freelancer Position

About us

askui contributes to their vision of a functional digital world with an innovative UI test automation solution.

For us here at askui, people are at the center of our work. That's why we bring the human touch to the automation process with *askui James*. We don't just test UIs according to rigid methods, we understand them like a human.

Your tasks

- Supporting the optimization of usability and user experience of our tool *askui James* by actively suggesting improvements
- Creation of mockups and implementation of these in the frontend of our tool *askui James*

Your profile

- You are confident in using Angular, TypeScript, HTML5 and CSS
- You have a feeling for good usability and UX
- Experience with agile development methods like SCRUM

Tech-Stack
Frontend: Angular HTML5/CSS TypeScript
Backend: Java Node.js Spring Boot
Other: Gitlab CI/CD AWS SCRUM

Conditions

- Availability of at least 10-20h per week
- Project scope of about 80h
- Start date: immediately

We are looking forward to your message!
