

Machine Learning Engineer (m/w/d)

Fulltime

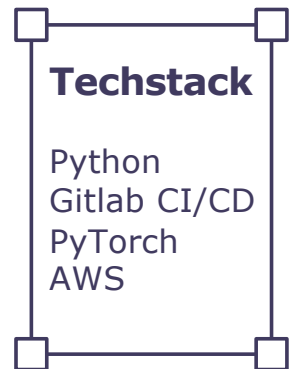

About us

askui contributes to their vision of a functional digital world with an innovative UI test automation solution.

We are looking for a Deep Learning Expert with hands-on experience in developing and deploying machine learning solutions. You will be working on our core functionality - the analysis of user interfaces with computer vision.

Your tasks

- Improving current object detectors
- Developing deep learning models based on UX criteria
- Analyzing what information is stored inside of screenshots of user interfaces and how to make it accessible

Requirements

- Successfully completed studies in computer science, mathematics, data science or comparable
- Good programming skills in Python and experience with ML frameworks such as PyTorch or Tensorflow
- Strong analytical thinking capabilities

Benefits

- An opportunity to be part of an fast growing early stage company and the chance to learn every day
- Personal onboarding and creative freedom in the implementation of your tasks
- A competitive financial package with the possibility to obtain shares of our company

We are looking forward to your message!
